About us

Innovative Irrigation for Green Spaces

Guttis is a leading global provider of irrigation and water treatment solutions, specializing in landscaping and gardening projects. We collaborate with top industry manufacturers to bring advanced, water-efficient solutions for gardens, parks, and green spaces worldwide.

Tailored Solutions for Every Project

From planning to execution, we offer comprehensive solutions, including system design, high-quality irrigation products, and seamless logistics. Our expertise ensures efficient and sustainable watering for any green project.

Commitment to Quality and Reliability

We carefully select premium suppliers to guarantee cutting-edge irrigation solutions. Our products are designed to optimize water usage, ensuring healthy landscapes with minimal waste.

Service You Can Trust

At Guttis, customer satisfaction is our priority. We provide full support at every stage—offering expert advice, fast and reliable shipping, and personalized service to ensure smooth project execution.

VALVES

Reliable check valves to prevent backflow and ensure smooth, uninterrupted water flow in your irrigation system.

LEARN MORE

Valves

The irrigation valves are durable and designed for efficient water control. They come in various models, ensuring compatibility with different systems. Built for reliability, they provide smooth operation and long-lasting performance.

Operation method

- Manual
- Authomatic

Power Options

AC & DC & DC Latch

Diameter

- 3/411
- 1½''
-]''
- 2"

Additional features

- Configuration:
 - Straight
 - Angular
- Soleniod
 - AC & DC
- Pilot pressure reducing

BACKFLOW PREVENTERS & PRESSURE REDUCING VALVE

Reliable check valves to prevent backflow and ensure smooth, uninterrupted water flow in your irrigation system.

LEARN MORE

Backflow preventers

Discover premium backflow preventers expertly engineered to protect your water system by ensuring that contaminated water never flows back into your clean supply.

Diameter

- ½'
- 11/4'
- 3/411
- 11/2'
- 1"
- 2"

Pressure Reducing Valve

Optimize your system's performance with advanced PRV valves that automatically regulate incoming pressure, safeguarding your equipment and ensuring smooth, efficient water delivery.

Diameter

- 3/411
- 1½"
- 1"

Options

- Regular
- Low flow

IRRIGATION CONTROLLERS

Smart and efficient irrigation controllers to optimize water usage and keep your garden thriving effortlessly.

LEARN MORE

Controllers

The irrigation controllers are reliable and come in various models to suit different needs. They offer precise water management, smart connectivity, and seamless integration with sensors. Designed for efficiency, they ensure optimal irrigation for any landscape or garden.

Power Options

AC & DC Functionality

Channel Selection

- Single channel
- Multiple channels
 - 0 2/4/6/8/12

Activation

- Analog
- Bluetooth
- Sim

Additional features

- Fertigation
- Compability as:
 - Soil Moisture Sensors
 - Flow Sensors
 - Rain Sensors
 - Temperature & Humidity Sensors
- Indoor/Outdoor application

SPRINKLER & DRIP PIPES

High-quality sprinkler and drip pipes for precise and efficient irrigation, ensuring healthy and vibrant landscapes.

LEARN MORE

Sprinklers, Drippers & Driplines

Our range of sprinklers, drippers, and driplines ensures efficient and uniform watering for all types of gardens and landscapes. Designed for precision and reliability, our irrigation solutions help conserve water while promoting healthy plant growth.

Sprinklers

- Basic
- Pressure compensated
- Part Circle/Full Circle

Button Drippers

- PC
- CNL

Drip Lines

- Basic
- Pressure compensated
- Anti-Siphon
- Non-DrainAuthomatic

Driplines Diameter

- 12 mm
- 20 mm
- 16 mm
- 22 mm
- 17 mm
- 25 mm

WATER METERS

Water meters are essential tools for accurately measuring water usage, ensuring precise monitoring and control across irrigation systems.

LEARN MORE

Water Meter

Advanced water metering solutions designed for seamless integration into irrigation systems, enabling accurate tracking of water flow to optimize performance and resource management.

Options

- Multi-jet water meter
- Ultrasonic Water Meter

Diameter

- 3/411
- 2''
-]"
- 11/2"

Items

- Wide range of Maximum Operating Pressure
- Including standards and certifications
- Long-lasting and reliable
- Installation at any angle in space

12 Years of Keeping the (Water) Pressure Just Right

You know how it starts – A small business supplying products, offering a pump here, some pipes, drippers, sprinklers, and a whole lot of ambition – and suddenly you find yourself shipping equipment to the east and west, designing and implementing international agricultural projects, and knowing how to say "pressure-compensating emitter" or "valve with head loss" even in your sleep?

That's how it started for us.

Over the years, we've gained experience, mud on our boots, and countless stories about drip irrigation, water pressure, and everything in between. We've dealt with endless meters of pipe, countless clicks with suppliers and customers, and dozens of moments where we told ourselves – wow, we did it again, we brought life to the desert. And just like any good irrigation system – we keep things flowing, avoid blockages, and make sure agriculture stays green and smiling.

What did we learn along the way?

Agriculture & Irrigation

That planning is everything (and knowing when a tiny nipple can save the whole system),

That agriculture isn't just about fields – it's about people, connections, and a passion for what grows the world,

And that if you work in irrigation, there's always someone who'll ask for... *a drop* of help.

Thank you everyone who's been *flowing* with us for **12 years** – our partners, suppliers, customers, and all the people who accompany us - *You are our source of nourishment*.

Your Fields and Yields, Our Water Solutions.
